Art Unit: 1651

1. Receipt is acknowledged of the instant application, which is the national stage of PCTGB00/03489 filed September 11, 2000.

2. Claims 1-6 are present in the instant application.

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1, 2 and 4, drawn to a compound and the pharmaceutical composition.

Group 2, claim(s) 3, drawn to a method for treatment a mammal affected by a malignant tumour.

Group 3, claim(s) 5, drawn to a method for preparing the compound of claim 2, which comprises isolation from the mollusk *Jorunna funebris*.

Claim 6 is not a statutory claim and cannot be properly examined as well as search for the claimed language.

4. The inventions are distinct, each from the other because:

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1651

Invention I do not require the specific special technical feature for preparing the generic Group 1 invention. Group 2 is not commensurate in scope with the preparation of the generic group 1.

Group 2 and Group 1 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the special technical feature can be prepared as described in the prior art reference noted in the PCT application to He, document D1.

Group 1 and Group 3 are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, Group 1 can be used in a materially different process of using that product.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

8.
